

Clarity eCommerce™

Standard Pricing for our out-of-the-
box eCommerce Offering

CLARITY

eCommerce Pricing

For common single store B2C, B2B and D2C offerings (C2C available - call for pricing), Clarity is offering you savings with a one-time pricing option:

✓ **\$24,995***
One-time Pricing

*One-time pricing includes the CEF license, API and 40 hours of Clarity time (eg. discovery, project mgmt., development, meetings, help w/ mappings, setting up HW environments, QA, etc). Support packages and multi-store upgrades are available based upon your requirements.

**For companies that are looking for a financing option, please consult our Sales team for customized pricing.

*** This eCommerce offering uses the base modules from our Enterprise eCommerce solution. This means that as your business grows, you can easily add modules (multi-store, multilingual, currencies, marketplace, auction, etc.) with new functionality and grow into our full Enterprise offering, while protecting your investment. Call for Enterprise pricing.

**** Integration packages are offered if you need your eCommerce solution integrated with your ERP, CRM, PIM, Supply Chain, etc.

Website Included

Each storefront will include a basic 5-10 page website and CMS (Content Management System), which will allow your marketing team to properly document and market your products and services. Clarity will stand up and provide basic styling (using some of the 40 hours provided) for the site. Additional time can be purchased for custom design work, styling, content and SEO work if desired.

The base CMS comes with a mobile responsive HTML skin, which provides automatic adjustments for your mobile, tablet and desktop users. Documentation and guidance can be provided to your team to build out your content, or you can use some of your hours for the storefront on the website.

The CMS will allow you to completely manage your own site, adding or editing any number of pages, content, SEO, blog posts, galleries, testimonials, etc. It is a fully functional and robust CMS.

Storefront

eCommerce Capabilities

Clarity eCommerce is a robust platform that can support a few to millions of SKUs, and provides out-of-the-box capabilities for more complex features typically found in an Enterprise B2B eCommerce solution.

As with most eCommerce products, Clarity eCommerce has the basic B2C (i.e. common) features covered, such as: mobile responsive template, wish lists, favorites, product comparison, order status, stock quantities, digital products, catalog sorting, filtering, shipping integration, sales tax calculations, product reviews / ratings, automated email notifications, product bundles, unlimited categories-attributes, WYSIWYG editor, PCI DSS compliance, Elastic Search and much more. This document is designed to highlight the more capable, B2B or advanced type of functionality that you also get from our out-of-the-box installation.

“

In less than a year after launching the new site on Clarity eCommerce, we created a new revenue stream and brought in \$700k within a few months. Since then, our online sales have grown from 15% of our business to over 40%.

Kristi Bond, Director The Newton Group

Out-of-the-box Features

Here are some of the more powerful features you get:

 PIM / Product Management

The ability to export, import and manage all of your catalog products. Specialized settings for shipping, inventory, pricing, images, SEO, related upsells and much more.

 Quick Add / Re-ordering

There are 8 out of the box ways your customers can easily reorder from you. Wish lists, Favorites, Shopping lists, past orders, past invoices, sales quotes, bulk XLS import and a quick add sales pad UI. There are subscriptions as well.

 Comprehensive Dashboard

Users have their own robust self-help dashboard that provides them access to all past orders, quotes, invoices, returns and much more. Everything they need to track, manage and pay for orders and invoices is all included.

Out-of-the-box Features

Split Shipping

Whether purchasing items from different fulfillment vendors, or buying multiple of a product where some number is shipped to each of multiple locations, Clarity eCommerce provides out-of-the-box split shipping.

Shopping Lists

Custom shopping lists can be created on the fly for “monthly office purchases” or “annual copy machine maintenance.” There’s no end to the benefits of creating and managing your own custom shopping lists.

In-stock Notifications

Improve conversions by allowing your customers to subscribe to an alert which will email them the second that the product they want to order that is out of stock, is back in stock.

Out-of-the-box Features

Invoicing

Clarity eCommerce has invoicing built in. Whether you need to create PDFs and let your customers download them, send them notifications to pay their invoices, or allow them to pay their outstanding invoices online, we've got you covered.

Subscriptions

Clarity eCommerce provides a mechanism for subscriptions. This works very well for supplies and memberships and helps provide stable, recurring revenue.

Multi-tiered Pricing

Clarity provides both role and customer-based pricing so that when your clients log in, all or some of the prices for products and services automatically adjusts for them.

Out-of-the-box Features

Headless eCommerce

Have an existing website that you want to use, but it can't offer purchasing, checkout or invoicing? Clarity eCommerce provides headless functionality and can be embedded into your existing website.

Advanced Analytics

Clarity provides an integration with the new Google advanced ecommerce analytics. This makes it quick and easy for you to track your ecommerce performance out of the box.

SEO (Products / Categories)

The admin UI provides a single-click option to generate both product and category sitemap.xml files for registration with Google. There's also an out-of-the-box WYSIWYG editor for creating dynamic and robust category landing pages.

Out-of-the-box Features

Custom Products / Variants

Clarity allows you to create your own custom product variants, as well as kits and bundles. You can also create and set your own pricing and inventory handling (i.e. reserve quantities for kits).

Shipping / Sales Tax

We've integrated hundreds of different shipping, LTL and international shipping carriers. Clarity is also a certified Avalara partner if you want to integrate their sales tax tool out of the box.

These are just a few of the features that are included in our base eCommerce solution. For more information, request a demo and we'll show you everything you get.

Additional Add-ons

Clarity eCommerce has an extremely extensible and customizable architecture. For clients looking for more than just out of the box, Clarity eCommerce comes with modules for multi-store, customer-branded portals, distributor portals, franchises, multilingual, multi-currency, customer emulated ordering, HIPAA compliance, global marketplace, multi-vendor, custom pricing rules (beyond discounts and promotions) and more. With our Connect (integration) platform, we can integrate your eCommerce solution with any CRM, ERP, PIM, 3PL, Supply Chain, or any other 3rd party application or API. Clarity eCommerce has been used by clients for stores up to 50 Million SKUs, transacting hundreds of millions of dollars each year.

On top of everything listed above, Clarity commonly does design and development for custom UI/UX, wizards, forms, product configurators and much more.
